

Fellowship Programme 2017

Call for Applications

About the Programme

The Singapore-Stanford Biodesign (SSB) Fellowship is an intensive 1-year hands-on team-based training on the entire value chain of medical device innovation, with access to training and faculty in Stanford University and Singapore.

SSB Fellowship offers you:

- In-depth training on the acclaimed **Biodesign Process of Innovation**
- Coaching by **Industry Mentors** & several **networking** opportunities within the medtech community in Silicon Valley and Singapore
- **Monthly stipend & overseas living allowance** provided

This national-level Fellowship seeks to select a **multidisciplinary team of FOUR Fellows** comprising of engineers, doctors and business/industry professionals. Fellows will work on innovation(s) together as a team, with an option to further the innovation(s) as post-Fellowship Entrepreneurs-In-Residence at SSB.

**Opening period for application:
1st March to 10th May 2016**
